

secureIT™

M SERIES

RF LIBRARY SECURITY SYSTEM

D-Tech's secureIT™ M-Series antenna system provides perimeter-based protection and improves alarm-handling capability for libraries where high-cost antenna systems are not appropriate or where cost-effective solutions are required.

Designed with a durable metal frame with simple and modern styling, the M-Series system provides a budget-friendly deterrent without compromising functionality or quality.

FEATURES

- Compatible with D-Tech 13.56 MHz RFID labels and items tagged with approved labels from book suppliers including multi-vendor reading (MVR), allowing reading of other RFID labels
- D-Tech's advanced digital RFID technology uses state-of-the-art, digitally-enhanced receiver to chip technology to ensure superior detection with false-alarm free protection
- Integrated alarm lights and sounder provide individual aisle identification through multiplexing
- viewIT™ software application collates and identifies all alarm incidents, with connection and troubleshooting status to installed system (RFID version only)
- Mounts as a free-standing unit or on a standard ramp
- Alarm output to recording equipment and/or voice alarms available
- Optional custom colors
- Optional integrated people counter

SPECIFICATIONS

	Antenna	Electronic
Height	72"	1"
Width	3"	7"
Length	18"	9"
Weight	42lbs	2lbs

MATERIALS

Steel

POWER SUPPLY

220/240 Vac

ELECTRONICS

LR2000 (Feig) - Tagsys multiplexer for larger aisle configurations

PERFORMANCE

Up to 63"

INSTALLATION REQUIREMENTS

- 1 x single aisle system requires two antennas and one electronic power supply
- 1x13amp spur/socket (depending upon location) per electronics
- Recommended AFI mode is supported for viewIT™ software, but EAS bit is also supported.

5803 New Jersey Avenue • Suite 101 • Wildwood Crest • NJ • 08260
