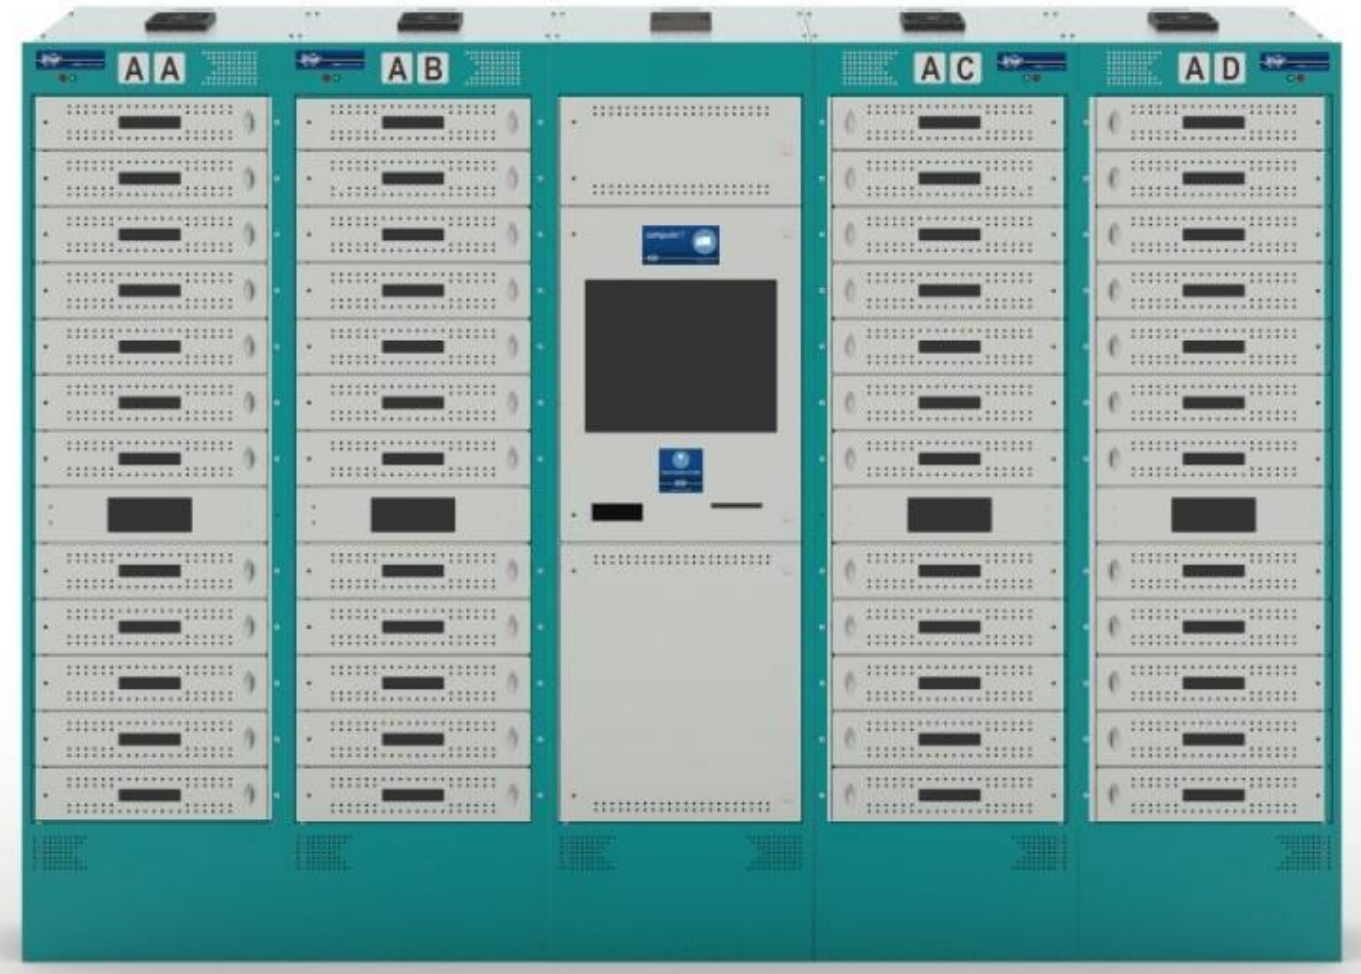
D-Tech International USA

CUSTOMER FOCUSED.
Customer first.

computeIT™



Laptop Storage and Charging

computeIT is a multi-bay, expandable kiosk designed to safely store, charge, distribute and log the return of any make or model laptop, tablet or similar device. It can be tailored to meet a library's needs, ranging from 12 to 96 bays, all within a small footprint and accessible by users of any age.

The system features an easy-to-use, 19-inch touchscreen interface and fully-integrated, keyless self-service linked to your ILS. If no ILS is available, the unit can be supplied with its own database. **computeIT** is compatible with all integrated library systems using SIP2 and comes equipped with barcode, Mifare, RFID and biometric card readers.

All models are ADA compliant, meet required safety standards and include a thermostatically-controlled temperature-management system in addition to theft-deterrent steel chassis and doors and safe power management, which ensures devices are charged quickly without overcharging.

computeIT can be color-customized using D-Tech's online color selector and configured to provide patrons with loanable locker space to securely charge their own devices. Libraries switching the types of devices offered incur only the cost of replacing charging cords, not the entire unit.

charging

SmartLine with PowaSave uses safe-charging cords specific to the make and model of your chosen device and does not require the AC adaptors that come with those devices. Its advanced PowaSave technology provides environmentally-friendly power savings by automatically sensing when devices are fully charged. It then stops charging to avoid wasting power, saving energy and costs. All devices are still charged simultaneously in the fastest possible time; safely, securely and without overcharging.

features

- Expandable kiosk with small footprint
- Safe charging and secure storage
- Suitable for any make or model device
- Available from 12 to 96 lockers on one touchscreen (scalable)
- Barcode, Mifare, RFID and biometric card readers
- Unicode language
- Thermostatically-controlled temperature management system
- LED charge status indicators
- Connection to ILS via SIP2 (real time)
- Meets all required safety standards and is fully CE certified
- BYOD (bring your own device)
- RAL powder-coated color choice
- ADA-compliant lower lockers

D-Tech's custom-colorized, 36-bay computeIT at the Brooklyn Public Library in New York.

options

- Solo database
- Integrated camera
- Phone jack
- Network compatible for data transfer
- Deep Freeze licenses
- USB-C charging
- **reportIT™ (remote monitoring)**

This exclusive D-Tech software allows libraries to remotely monitor check-ins, check-outs, what items are overdue and which ones have been returned. It records how much the kiosk is used and assures it's working properly. Statistics are collected regularly and can be viewed any time.

specifications

Per terminal unit:	
Height	**6½ feet (77 inches)**
Width	**21 inches**
Depth	**21 inches**
Weight	**144 lbs.**
Power Consumption	**110v-1.2amp**
Screen Size	**19-inch touchscreen**
Scanner	**BC, MI, MAG, BIO**
Printer	**Thermal**
Power Outlet	**Back, top or bottom**
ILS Communication	**SIP2**
Per locker unit:	
Height	**4 inches**
Width	**18 inches**
Depth	**16½ inches**
Weight	**177 lbs.**
Locker Size	**4"H x 18"W x 16.5"D**
Power Consumption	**110v-10amp**
Power Outlet	**Back, top or bottom**
